Professional Summary

UI/UX Engineer with 8 years of professional experience specializing in the design and development of pixel-perfect, responsive, scalable, and accessible web interfaces for enterprise-grade applications. Strong expertise in HTML5, CSS3, SCSS, and responsive UI engineering, with a proven track record of translating complex Figma designs into production-ready user interfaces. Also experienced in UI-first React development and JavaScript-driven UI interactions.

Extensive experience working in platform-based environments, particularly Unqork, where I have led UI styling, component customization, feasibility validation, and design system alignment initiatives. Adept at collaborating with UX designers, product managers, business analysts, engagement managers, configuration teams, and engineering leadership to deliver high-quality UI solutions.

Currently focused on UI-first React engineering, accessibility-driven development, performance optimization, and building maintainable, scalable UI architectures that support long-term product growth and enterprise standards.

Certifications

- Google AI Essentials – Coursera
- CSS for Designers – Uxcel
- Introduction to Figma – Uxcel
- Unqork Novice Configurator Badge – Unqork

Core Skills

- Front-End Technologies: HTML5, CSS3, Bootstrap 4/5, JavaScript (UI-focused), jQuery, React JS, SASS/SCSS.
- Responsive Design & Optimization: Media Queries, Flexbox, Grid, Cross-Browser Compatibility, Web Performance.
- Tools : Git, GitHub, Visual Studio Code, Figma, Jira, Lighthouse, GTmetrix, Chrome DevTools,.
- Additional: Web Accessibility, Agile/Scrum, Unqork Platform (UI Configuration & Styling)

Achievements, Awards

- Award of Excellence for outstanding UI contributions, exceptional expertise in styling, and consistent delivery of high-quality solutions for a strategic enterprise initiative.
- Team Excellence Award for collective ownership, seamless collaboration, and successful delivery of high-impact enterprise UI solutions.
- Best Team and Star Team Awards at Tata Consultancy Services for outstanding delivery and collaboration.
- Recognition for creating and presenting a UI/UX business model during leadership and stakeholder visits.
- Repeated appreciation from project managers and leadership for UI quality, performance, and design accuracy.

Professional Experience

Aiden AI Pvt Ltd

SENIOR UI ENGINEER | JUL 2024 - PRESENT

ROLE OVERVIEW

Working as a Senior UI Designer responsible for end-to-end UI delivery across enterprise Unqork-based web applications. The role involves UI feasibility analysis, design-to-code implementation, styling architecture, accessibility compliance, and cross-team collaboration.

KEY RESPONSIBILITIES & CONTRIBUTIONS

- Led UI implementation and styling for multiple Unqork applications, ensuring pixel-perfect adherence to Figma designs
- Built and enhanced responsive UI layouts with consistent spacing, typography, and grid systems.
- Customized Unqork components to align with branding standards, UX guidelines, and enterprise design systems.
- Improved cross-module UI consistency including typography scales, spacing tokens, color systems, and visual hierarchy.
- Created and maintained scalable SCSS architecture with reusable patterns and naming conventions.
- Optimized UI performance and ensured cross-browser compatibility across Chrome and Edge.
- Resolved complex styling conflicts, component overrides, and layout issues within Unqork’s modular framework.
- Developed UI Proofs of Concept (POCs) to validate design feasibility and identify platform constraints.
- Collaborated closely with UX designers, project managers, engagement managers, business analysts, Unqork developers, and COE teams.

- Participated in Agile ceremonies including daily stand-ups, sprint planning, grooming, and retrospectives.
- Supported product and business teams by validating UI approaches and layout feasibility during requirement discussions.
- Participated in UX review calls and client discussions to refine UI requirements.
- Received excellent UI feedback from stakeholders, management, and project leadership.
- Mentored junior engineers, interns, and new joiners on HTML, CSS, SCSS, responsive design, Git workflows, and Unqork UI styling.
- Created internal UI coding guidelines, styling checklists, and best-practice documentation to improve team efficiency
- Consistently delivered defect-free UI across multiple projects, improving design consistency, reducing QA effort, and enabling faster releases.

I-PAC (Indian Political Action Committee)

LEAD ANALYST | JUN 2023 - JUL 2024

- Spearheaded website redesign, emphasizing responsive development..
- Enhanced user interaction and engagement through JavaScript and jQuery
- Transformed design mockups into functional HTML/CSS templates.
- Efficiently managed databases using SQL and collaborated with backend developers.
- Implemented performance optimization techniques and conducted thorough testing.
- Ensured cross-browser compatibility and maintained clean, well documented code.
- Documented design and development decisions for effective knowledge sharing

Motivitylabs

SOFTWARE ENGINEER | OCT 2022 - MAY 2023

- Led the development of a React.js application, emphasizing industry standards.
- Utilized Bootstrap 5, React-Bootstrap, and React Material UI for UI development.
- Configured the routing module using React Router and demonstrated proficiency in React.js concepts.
- Integrated Material UI components and executed CRUD operations with axios/fetch.
- Extensively used Git for version control and collaborated with junior associates.
- Played a key role in the Enterprise Architect Team and served as a training coordinator.
- Created flow diagrams and business requirement documents for the React application.

Sreeal Technologies Pvt Ltd

UI DEVELOPER | SEP 2016 - MAR 2021

- Developed front-end using HTML5, CSS3, JavaScript, and jQuery with Bootstrap frameworks.
- Ensured compliance with industry standards through clear documentation and coding standards.
- Applied Bootstrap frameworks for enhanced functionality and optimized websites for speed.
- Conducted browser compatibility testing and demonstrated interest in UI design.

Tata Consultancy Services

SYSTEM ENGINEER | DEC 2012 - OCT 2015

- Conducted user flow analysis and accessibility assessment.
- Implemented web accessibility standards using HTML, CSS, and JavaScript.
- Acted as the Point of Contact for video conference meetings and contributed to team-building activities.

Education

VARDHAMAN COLLEGE OF ENGINEERING

BACHELOR OF TECHNOLOGY IN MECHANICAL ENGINEERING, 2008-12
